being the intrusive rock

The raises from the lower tunne on the Nevada Birch Creek propcity according to report, are getting into the formation which underlies the orebody, and in a very Oping Ton 92, 100, 92 400, 97; short time will, beyond a doubt, be on the under side of th orehody, says the Reese River Re

When the tunnel was started the presumption was that the great ore body would go down at an angle of not less than forty-five degrees, and that the tunnel would out it in a limit distance and then it would be plans sulling to drift and take out he ore to the tunnel level

The oreholy is so very large that it was impossible in a short time or get over it and ascertain the dir of the vein, and this lower tunnel was one means of finding out just which way it does dip. The concerion now is, among those who have alon: an interest in the showing that the dip of the ore is so alight as for bring it under the classification of a blanket yein, and that it will be worked through the tunne from beneath.

Juck Cahill who has studied the albert Kelly has bought the house ore deposit and the surrounding

tunnel, the tunnel limit being sent straight ahead, and the face is still in the cold-hearing material which varries in richness from the picture staff so greatly admired, to a good pushes of commercial ore Crosscuts have also been can from the tunnel; with to apparent change in the rock and nothing to indicate. that the border is near
